Many thanks", "Great to learn new tips on story telling and reading tips" and "Thought the workshop went well. Got the children thinking and talking about texts and engaging well in the classroom together"

## Numicon baseboards

We are delighted with the feedback that we have had from you with regards to Numicon for Maths and many of you have bought the Numicon sets from us to work with your children at home.

Some parents have asked us if they can buy the Numicon Baseboards so that they can use them at home with their children.

We have been able to source a supply of the boards at a cost of £5.50 each. These will need to be ordered, so if you would like a Numicon baseboard please place an order with your payment of £5.50 per board at the school office. (cheques should be made payable to Worcestershire County Council).

We will let you know when they are delivered and ready for collection. Don't forget basic Numicon packs are still available.

Are there any kind volunteers who could spare an hour or two a week to listen to readers in Year 2? This is an important year for this group of children and we would like to try to listen to every child at least twice a week, as well as them reading at home. They are a lovely group to listen to because they are really coming on well with their expression.

If you have some spare time, even if it's not long term, and would be willing to come in and help, please speak to Mrs Burgess or Miss Campbell. Many thanks.

For the last few weeks Yr 5 pupils have been visiting the DT department at King Charles 1 High School. They have worked at designing model Greek villas on the computers and these designs were then cut out using a laser cutter and finally the models were constructed and painted.

The completed models will be on display in the Year 5 classroom from 3pm on Friday 5th February and you are warmly invited to come and see them and ask Year 5 all about them.

### Safeguarding

#### Home broadband controls

Most internet providers like BT, Sky, TalkTalk and Virgin Media offer **free filters (link is external)**, giving you control over what internet content comes into your home. This means that any device that connects to your home broadband is subject to the controls that you have set on your home router or hub. These are sometimes referred to as 'whole home filters'. These can mostly be found in settings but your provider will help you with any advice.
