

Due to our consistent success, we have been offered the opportunity and funds by Worcestershire Children First, as the site for a 10 place Mainstream Autism Base (MAB)

What is a Mainstream Autism Base?

A mainstream Autism Base is a dedicated building and area within a mainstream School serving the needs of children with Autism. Ours would have 10 children.

Why is Chaddesley Corbett Primary School a good choice?

Our school is a fantastic choice because we have an absolutely outstanding environment with an already embedded ethos of meaningful outdoor learning. This makes it a brilliant choice for ALL children as well as children with complex needs.

Would the base be separate from the rest of the school?

The base would be within the school grounds and children from the base would be our pupils. They would be able to move, with supervision, around the school to work in groups or use the library, hall and outdoor learning space. The base would have its own classrooms, play area, toilets and staff.

How do children get a place in the base?

Children who have an EHCP (Education Health and Care Plan) for Autism which says they need a specialised unit within a mainstream school would be referred directly by the local authority. Parents going through the EHCP process with their child would be able to state that because of our care, we are their choice of school.

How will the base affect the rest of the children?

As Mainstream schools receive increasing numbers of pupils with complex needs we are confident that growth by having a base will ensure that ALL learners benefit. With our enhanced provision and on site expertise we would eliminate any distraction by expertly better meeting the needs of pupils who aren't placed in the base but would benefit from us having specialists in the base.

What is the next step?

A consultation process. We need to hear everybody's views and concerns. We are really excited and proud but understand there will be a lot of questions. We will share more detailed information and have some meetings. We want to hear from Parents and the local community.
